Boburjon Rahimjonov

Front-End Developer | Uzbekistan, Tashkent

github.com/RahimjonovBoburjon

Vue.js, Tailwind CSS, Firebase, Vite, JavaScript

Education

Uzbekistan State World Languages University Lyceum   *Sept 2024– Present*

Specialized in multilingual studies (English, German, Russian) and Information Technology. Gained hands-on experience through start-up projects in web development and AI solutions.

Experience

Front-End Developer | Freelance   *Jan 2021 – Present*

○ Built 15+ real-world web applications using Vue.js, Tailwind CSS and Firebase.

○ Integrated real-time features and authentication systems with scalable architecture.

○ Delivered AI-powered tools and dashboards with a focus on performance and clean UX.

○ Created end-to-end web solutions for start-ups, EdTech platforms and automation projects.

Projects

Zuvva – AI-Powered Price Comparison Platform

○ Developed Uzbekistan's first platform to compare prices across local marketplaces using AI.

○ Built with Vue.js and Tailwind CSS, featuring real-time product search by name, link or image.

○ Integrated real-time data extraction from platforms like Uzum, Olcha, Texnomart and Asaxiy.

ChatSpace – AI Chat Assistant for the Uzbek Language

○ Creating Uzbekistan's first AI chat platform designed specifically for Uzbek speakers.

○ Built with Vue.js, Firebase and OpenAI API, featuring smart Q&A, translation and subject explanations.

○ Integrated plans for voice-based interaction using Speech-to-Text and Text-to-Speech technologies.

Aluzswlu Academy – Online Learning Management Platform

○ Developed an educational platform for lyceum and university preparation courses.

○ Implemented Firebase Authentication and Firestore.

○ Built clean and modern UI using Vue.js and Tailwind CSS.

Awards & Honors

○ Completed multiple large-scale freelance projects with top client satisfaction.

○ Achieved top ranks in internal project competitions and hackathons.

Activities

○ Active in continuous learning and building AI and education-based web projects.

○ Planning to launch a blog on Front-End development and AI integrations.

Skills & Interests

○ Front-End Development: Vue.js, Nuxt, Tailwind CSS, JavaScript.

○ Back-End & Database: Firebase (Auth, Firestore, Hosting, Functions).

○ AI Tools: OpenAI APIs (GPT-3.5, GPT-4).

○ UI/UX: Responsive web design, GSAP animations, pixel-perfect layouts.

○ Version Control: Git, GitHub.

○ Other: Agile workflow, modular architecture design.

○ Interests: AI in Web Development, EdTech, Start-ups, Real-time Applications.
